The Sedra/Smith, Microelectronic Circuits, Seventh Edition book is a product of Oxford University Press, not National Instruments Corporation or any of its subsidiaries or affiliated companies."Testimony from David has provided a renewed consciousness of Christ's work in my life. This has led to an increased awareness of the ways in which I have let other things take first place in my life, to the detriment of my walk with God. I am eager to take steps to be more intentional about living a life of faith and of integrity in all I say, do, and achieve. I know that the Lord wants me to take every opportunity to tell others of his Son, and I am grateful for the opportunity to do so through this ministry." Except for www.google.com! I have been following instructions from this website It seems to go fine until Chrome displays a cert warning, then when I visit the site I get a broken image f678ea9f9e
