Thinkstock Author: A. Nicolae Date: 2 August, 2012A Hollywood actor performs onstage during the celebration of the 60th anniversary of Tihany Abbey on Lake Balaton, in Tihany on July 9, 2012. Shares of Apple Inc. surged nearly 4 percent in the extended session on Thursday and were up more than 13 percent, the most of any Dow stock, after an analyst at Goldman Sachs predicted the iPhone maker would report a record quarterly profit. Sony needs to commit to selling every PS4 game ever released on PC Sony, you need to sell every PlayStation 4 game on PC. This is a very common complaint, since it makes sense to do so. I'm glad it's being voiced. The Xbox 360 is getting harder and harder to find. You have to hunt on eBay and scour store shelves. And my local Gamestop told me the last one sold there was a few months ago. If you're a PC gamer and your PlayStation 4 was released in August 2013, it's coming with several games you never knew you were missing. Each of the consoles started off with only two launch games: Halo 3 and Call of Duty 4: Modern Warfare. In the 16 months since then, the PS4 has slowly grown to a full library of games, one that rivals that of the Xbox One and the Wii U. Sony has also added PlayStation Now, allowing you to stream PS3 games, most of which are older titles and not ones you'd expect to see on the Xbox One. And, Sony announced some new console exclusives such as Killzone Shadow Fall. As for the Wii U, it's not even a year old yet and you'd be hard pressed to find a store that is carrying it. By the end of this year, I'd be surprised if it has more than a handful of titles in its library. So if you're a PC gamer that wants an Xbox One or a Wii U, you're in for a rough time. But what about a PlayStation 4? Each time I look at the PS4, I still can't believe it was only two years ago that Sony announced the console and made all of this content available to me. Sony's been updating the PS4 on a fairly consistent basis. Sony added a Share button, promised more games for the year. And the PS4 came with three exclusive games that no one else was getting: Killzone Shadow Fall, Knack and MLB 14: 82157476af
